GERMAN RELIABILITY...

In 1948, the late Mr. Rambold invented the first **double chamber tea bag**. However, as a man who was always thinking ahead, he also developed the machine to produce it. He took his time, meticulously going over every part and improving them restlessly.

The result was a machine that **revolutionized the market** when introduced in 1949, a machine that is still reliably working in factories around the world, a machine that is still being considered the benchmark for those who love good tea in proper tea bags.

We not only honour our founder in keeping his philosophy alive, but also by keeping his spirit alive: always on the cutting edge of development and setting new standards. **Let us honour him together!**

...WITH GLOBAL FLEXIBILITY
